

SUBMISSION OF THE PROJECT REPORT- KANAPARRU

27-01-2019

Greetings of peace and joy to *Spicma* team from Fr. Yeruva Rajesh Reddy, the parish priest of Kanaparru. By the grace of God everything is fine with me and hope the same with you. I wish to take this chance to wish you **HAPPY CHRISTMAS AND NEW YEAR 2019**. May God be with you and with your congregation in the coming year. I am happy to present the report of project granted to me by your generosity.

Project Cause

Construction of toilets in R.C.M SCHOOL, Mallaipallem, Nadendla, Guntur (dt), Andhrapradesh, India, 522549.

Benefit of the Project

This project has totally changed the environment of our school. All the students are using the toilet without any problem. The children in the school are very happy for the toilet facilities in the school. This project helps the children to attend class in time without late during recess hours. Before the construction, children are going for sanitary uses to a long distance which takes a lot of time to come back. They are unable to attend classes in time. But with the construction of toilets they are able to come back within no time. The other major impact is hygiene environment. The hygiene environment makes them to be healthy. There is full attendance without absent in the class. The parents of children are very happy for constructing the toilets in the school campus. I can proudly say that there is a lot of impact in school developing. With this project, the strength of the school will increase and many students will benefit with it. I can't just say a word thanks as it is a lot to us. The aim of the project is also met by supplying hygienic drinking water to the students. Students are very happy for providing drinking water in the school. Hand washing facility is also provided to students by installing a sink in the outdoor. The new drilled bore well helps to get the school water every day without depending upon the municipal water suppliers. Hence I can proudly say that 100% drinking water facility is provided in all the school by establishing taps and new bore well at the school campus.

A Word of Gratitude

I deeply express my gratitude to you all for blessing our children with toilets. I am sure that without your aid we cannot accomplish the basic need of our school children moreover specially the donors who came forward to help us. Once again thank you from the bottom of my heart. I do pray for your society that it may help many needy in the world.
